October 12, 2018 Technical Meeting

Welcome to STLE Houston Chapter's 2018-2019 Lunch Seminar Series!

Our second technical seminar of the season will be held on **FRIDAY**, October 12, 2018 at Maggiano's Little Italy, starting off with networking at 11 AM. **Jeff Weikert**, South-Central Sales Manager and **Andrea French**, Specialist and Industrial Sales Manager of Beckman Coulter will be presenting "*Fluid Contamination: Measurement for Control*". Please reserve the date!

Abstract:

Companies purchase expensive equipment and many take marginal care of the precious tools of their trade due to the lack of proper training of operation, coaching upon the limitations and capabilities of the equipment, and the proper measurement of fluid to extend the life of equipment. Also, manufactured fluids for use in industrial equipment and offshore hydraulic oil, solvents, and chemical mixtures must be consistently formulated and monitored to meet specific ISO Codes. We help with the particle size measurement to meet those codes hoping to avoid leaks and hazardous failures and to give a way for the manufacturer to consistently produce their finest end product for their customers.

We have over 30 years of perfecting this way of measurement and it has become a standard in many industries.

Speakers:

Jeff Weikert is experienced in application fluids measurement technology within the hydraulics, drilling, aerospace, and mining fields. He has over 25 years' experience in particle contamination measurement in industrial and semiconductor environments for fluids and critical gases. He was a former Key Account Manager for domestic OEM specialty equipment manufacturers. He is a graduate of Kent State University, with a BBA in Marketing and Advertising.

Andrea is an experienced National Business Development Manager with a demonstrated history of working in many industries including oil and gas as well as life science. She has a 16 year career with Danaher, working for both Hach and Beckmann Coulter. She is responsible for sales organizations including territory management, market development, key account management, and management of direct and specialist sales teams. She has a BS in Chemical Engineering from the University of Virginia and is a Harvard Business School Core Graduate.
